Dong et al. (2019), Fig. 12(b), versus OpenCourant
Free-X baseline; uncalibrated; AMS and quasi-static unqualified
Thin wall, t = 0.3 mm — published range
Early OpenCourant history
Paper experiment 1 (digitized)
Paper experiment 2 (digitized)
Paper FE (digitized)
OpenCourant (completed; quasi-static unverified)
No OpenCourant history
beyond strain 0.650
Calibration / experimental agreement
not established by this plot
Nominal compressive stress (MPa)
Nominal compressive strain
Reference: samples of published raster traces; missing and clipped segments are not extrapolated.
