Dong et al. (2019), Fig. 12(b), versus OpenCourant
Legacy interior-X-pin baseline; not calibrated
Thin wall, t = 0.3 mm — published range
Early OpenCourant history
No OpenCourant history beyond 0.650
Calibration / experimental agreement
not established by this plot
Nominal compressive stress (MPa)
Nominal compressive strain
Paper experiment 1 (digitized)
Paper experiment 2 (digitized)
Paper FE (digitized)
OpenCourant (completed; quasi-static unverified)
Reference: samples of published raster traces; missing and clipped segments are not extrapolated.
